When too numerous they fill the void without removing the ache. Tenors rarely sing words and often produce regional sensations rather than actual notes. During the mating season, they draw attention to themselves by a practice known as RUBATO.

USUAL OFFICES Matins and Evensong - few churches possess any other usual or even unusual offices. Choristers would be well advised to make sure before leaving home, especially in winter.

VERGERS. There were originally meant to lead processions, (and subdue rioters) with their wands or verges. Nowadays they also make strong sweet tea, sweep dust and pencils under the organ pedals - and acquire keys to everything. No verger, however officious, should ever be crossed. His range of retaliations include inadequate fuses, wrong hymn numbers, and in extreme cases, tidying up the choir stalls.

ZOOM. New feature in space distancing, or showing up the blemishes on the long suffering organist or organ!

Thanks to Mark Jameson for supplying this apt cartoon.

The Organ Club Newsletter

Number 96 May 2020

1. NOTICES

Covid-19

In common with most Societies, the Covid-19 pandemic has had a severe impact on the activities of the Organ Club, causing the postponement of all activities at least until July. In all probability, and having consideration to Government pronouncements of the last few days, the restrictions on public gatherings and performances will extend beyond July. Members are advised to check with the relevant websites before attempting to attend any of the recitals publicised in section 3 of this newsletter (but not the <u>organrecitals.com</u> web site – it has temporarily closed).

We will keep you informed when we can resume our visits in future newsletters.

In the meantime, young organists can enter a virtual organ competition (see below), and all members can enter a quiz organised by Past-President John Miley, see section 4 below.

The Organ Club committee wishes to convey our best wishes for all members whilst this pandemic afflicts the populations of the world.

Isle of Man Tour - September 14th to 19th 2020

Unfortunately, we have had to postpone the IoM tour (organised by Don Roworth). We are hoping that the tour will go ahead in September 2021.

AGM Postponement

Owing to the Covid-19 pandemic, the AGM which was due to take place at St Alphage Burnt Oak on Saturday March 21^{st} 2020, has been postponed. We will endeavour to hold the AGM as soon as is practicable, if necessary with social distancing, and at a time when committee members (many are over 70) can attend.

We will publish the new date for the AGM in a forthcoming newsletter, as soon as it becomes known.

2020 Membership and Special Thanks

By Easter around 80% of our members had renewed. For those who have done so, a big thank you, and especially to those who have added extra.

The AGM booklet was posted to every member, those who had not renewed at that point were also sent a printed renewal form, but the response has been disappointing. Your membership number appears on the label of posted Newsletters, and all mailings, including this year's AGM booklet and Journals posted by our Journal Editor – membership numbers starting with "19" **are now overdue for renewal**. This May Newsletter is the third for 2020 and one Journal has been issued.

If your address, telephone contact and e-mail are unchanged, I do <u>not</u> require the form to be returned. I appreciate currently we are in difficult times, but your loyal membership is appreciated. The best way to renew is to make a bank transfer – the account is:

THE ORGAN CLUB, sort code 20-31-52, account 00655171

Please use your surname and post code as reference. If you have not used an electronic transfer to pay before, any bank will help you – take this Newsletter with you if you need to show them the account detail. If you use a cheque, please write your post code on the reverse side. Part of your daily exercise can be a walk to your local post box.

My contact details:

Mark Jameson – 92 The Hawthorns, Charvil, Reading RG10 9TS telephone 01189 344212; e-mail markmdjameson@btinternet.com.

I would like to give special thanks to Kevin Slingsby, our Journal Editor. The latest Journal was produced at a difficult time and he took on the extra task of printing and distributing the AGM booklet. Solo he dealt with receiving Journal 2020/1 from the printers, envelope preparation, Journal and letter insertion, then posting. Normally John Miley helps with this task, however social distancing made it impossible this time.

The responses I have received on the quality of our Journals show what a vital asset it is to the Club.

Thank you to those who have written – your letters have been circulated to those involved.

Mark Jameson (Membership Secretary)

INCUMBENT. In an Anglican Church, he is the boss and holds himself responsible not only for his own actions but for those of the organist. This species is however becoming more rare and will soon be replaced by mostly the female variety.

JOLLY, A church full of those talking with each other - all ignoring the post service mini-recital that the organist has spent hours practicing!

LEGACY. What ever organist hopes for to refurbish the failing organ.........

MEN. These are what choirboys are intended to grow into. Their traditional privileges include arriving later than the boys on rehearsal nights. counting rests audibly, visibly, or wrongly (or any combination of all three) They also take snuff, mints or umbrage, according to taste. There are three main varieties - altos (whose origin is shrouded in mystery) tenors (glamorous, fickle and rare) and basses (solid, dependable, tenacious of note, opinion and often unfortunately, life). In mixed choirs, the men do not arrive late, and they leave with the women.

PEDAL RUMBLE. The local piano player who rests his size 10 on the bottom note of the pedal board continuously!

RECITAL. This is usually a performance given by the organist, with heavy emphasis on the word 'given'. Practising for a recital is one of the least understood activities in the church. The start of such a session may be the signal for three other things to happen - the Vicar wanders in for a chat, the Verger switches on the Hoover, and a student from the Royal College of Music pops up to enquire if practice is allowed.

SEX. Not allowed to be discussed - but makes or breaks choirs, clergy and public.

SKYPE. Intrudes into the privacy of your home study working area!

TENORS. Most churches have either (a) none or (b) too many. When wholly absent they leave an aching void.

referee between the singers, usually favouring the trend of the majority.

CYPHER. This is when the note on the organ refuses to stop.

Organists of many years' experience vouch that the only thing to do is to switch it off, write a note to the tuner and go home. This is the quickest way to (a) a rebuild, (b) Lunch.

DEATH. Has the priest noticed that the organist has collapsed with the long single note sounding?

DESCANT. One of the two major church nuisances, the other being pigeons. At least no descant has yet spoilt a hat.

DIAPASON. Before going into action, the good organist always 'draws his diapasons' A glance in the mirror will reveal the strength of the opposition, and more or less diapasons are drawn accordingly. When practising in an empty church, and to avoid damage, the organist uses stopped diapasons.

EVENSONG. The evening service of the Anglican Church, sometimes held in the afternoon so as not to interfere with television. A sermon will, most likely be appended, and this will be at least as long as the rest of the service. The evensong sermon gives the organist his last opportunity of marking the register and preparing next week's music list. In some churches, the lights are turned out to prevent this.

FEET. Many organists make use of both of these. Generally speaking, the left one is in charge of vibrations, whilst the right cruises gently in sympathy. A good organist does little damage with his right foot.

GIRLS. Unsatisfactory alternatives to boys.

GROUND BASS. A corruption of 'go round bass'. The sort of singer who SHOULD sing the lowest part, but now and then has a dabble at some of the others.

HYMNS. These are of two kinds, long and short. They are bound together in volumes which are either too big or too little. Both kinds are sensitive to the pull of gravity at solemn moments.

William Saunders - our new President Elect

We are delighted that William Saunders has agreed to be our new President Elect, and will succeed Eric Shepherd as President in 2021.

William Saunders is one of Britain's leading concert organists, with an extensive schedule that includes many distinguished venues across Europe. He tours Germany annually and has performed recitals in including Hamburg and Cologne Cathedrals and the St Marien Church in Lübeck. His musical activities in the United Kingdom have included performances at the Cambridge Summer Music and Oundle International Festivals, and he has also accompanied the Kings Voices, the mixed-voice chapel choir of King's College, Cambridge and Aldeburgh Voices, a choir established by Benjamin Britten.

You can find out more about William by visiting: www.william-saunders.info and his Facebook page https://www.facebook.com/musicianwilliam .

St Edmundsbury Virtual Organ Competition

St Edmundsbury Cathedral is offering the first virtual organ competition for young organists aged up to 22, in a bid to encourage and promote music-making during these challenging times.

There are three categories:

- Beginners (up to grade 5): one piece up to 5 min
- Intermediate (grades 6-8): one or two pieces up to 10 min
- Advanced: a recital lasting up to 15 minutes in duration

Candidates will be asked to upload a video of their entries (candidates must have access to a home organ) - closing date for submission: June 6^{th} 2020 12:00, and the announcement of winners will be 13^{th} June.

NB - these dates are under constant review and may be extended in line with current guidance as it is recognised that many people will not have access to an instrument at this time.

Full details, including prizes, panel of judges, and an application form are available at: https://stedscathedral.org/music/ (scroll down to "ORGAN COMPETITION")

Some *Musical & Organ Definitions* suggested by John Varney and Mark Jameson

ABSENCE. The only quality of an organist which is generally recognised.

AMEN. This may be plagal, perfect, Gibbons, Smith, sevenfold or said. The important thing is for everyone to know what is intended, since one thing is certain - they don't mix.

BACH. A composer about whose organ works and their performance it is necessary to have views. Their views should be published and adhered to. In practice, on most English organs, the choice is between skinny Bach and tubby Bach. An infallible way of detracting attention from the architecture of the last two pages of any Bach fugue, is to allow full swell to creep in and blurr the edges. This will thrill the listener and also, save a great deal of practice time.

BATS. Decorators and tuning aid for organ pipes.

BOYS. Unsatisfactory alternatives to girls.

BUXTEHUDE. A composer who would have liked Bach or Handel or anyone else, to marry his daughter. In memory of this, one of his organ pieces is often played as the first item in a programme.

CHANTS. These brief psalm tunes come in three varieties. Anglican, Plainsong, and Gelineau. The chants themselves are harmless and the organist is often required to play them first to prove this.

Unfortunately, words are then added, at which point he acts as a
